

M+S Hydraulic PLC

Statement on REACH

July/2021

The European Union (EU) has adopted regulation no.1907/2006, also known as the REACH (Registration, Evaluation and Authorization of Chemicals) regulation, which became effective on 1st of June 2007.

The aim of REACH is to improve the protection of human health and the environment through the better and earlier identification of the chemical substances.

M+S Hydraulic PLC meets all applicable REACH requirements, including the latest 219 substances subject to analysis per the REACH Regulation last updated on 8th of July 8, 2021.

M+S Hydraulic PLC has contacted all of our suppliers and to the best of our knowledge none of the products that we sell contain any of the Substances of Very High Concern (SVHC's) currently on the candidate list in **concentrations of >0.1% by weight**.

The list of substances can be found at:

[Substances restricted under REACH - ECHA \(europa.eu\)](https://eucha.europa.eu)

Registration is required for companies that either produce or import into the EU any substance in volumes that exceed one ton per substance.

M+S Hydraulic PLC does not exceed this import amount, and will therefore not be required to register.

M+S Hydraulic PLC
